

SEYOU

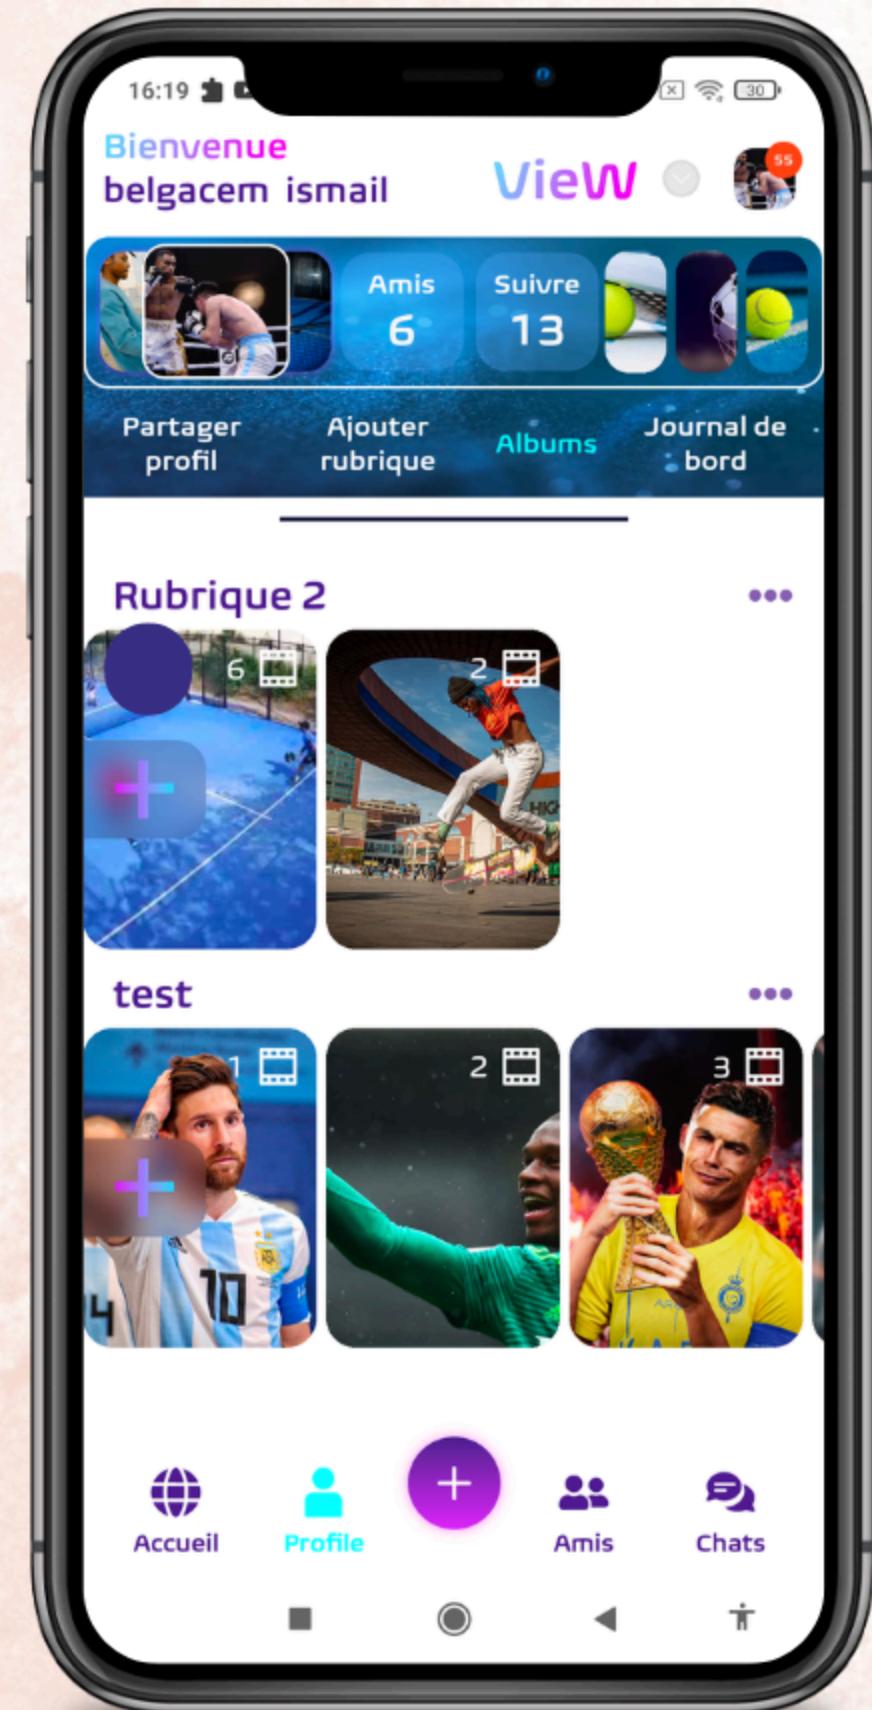

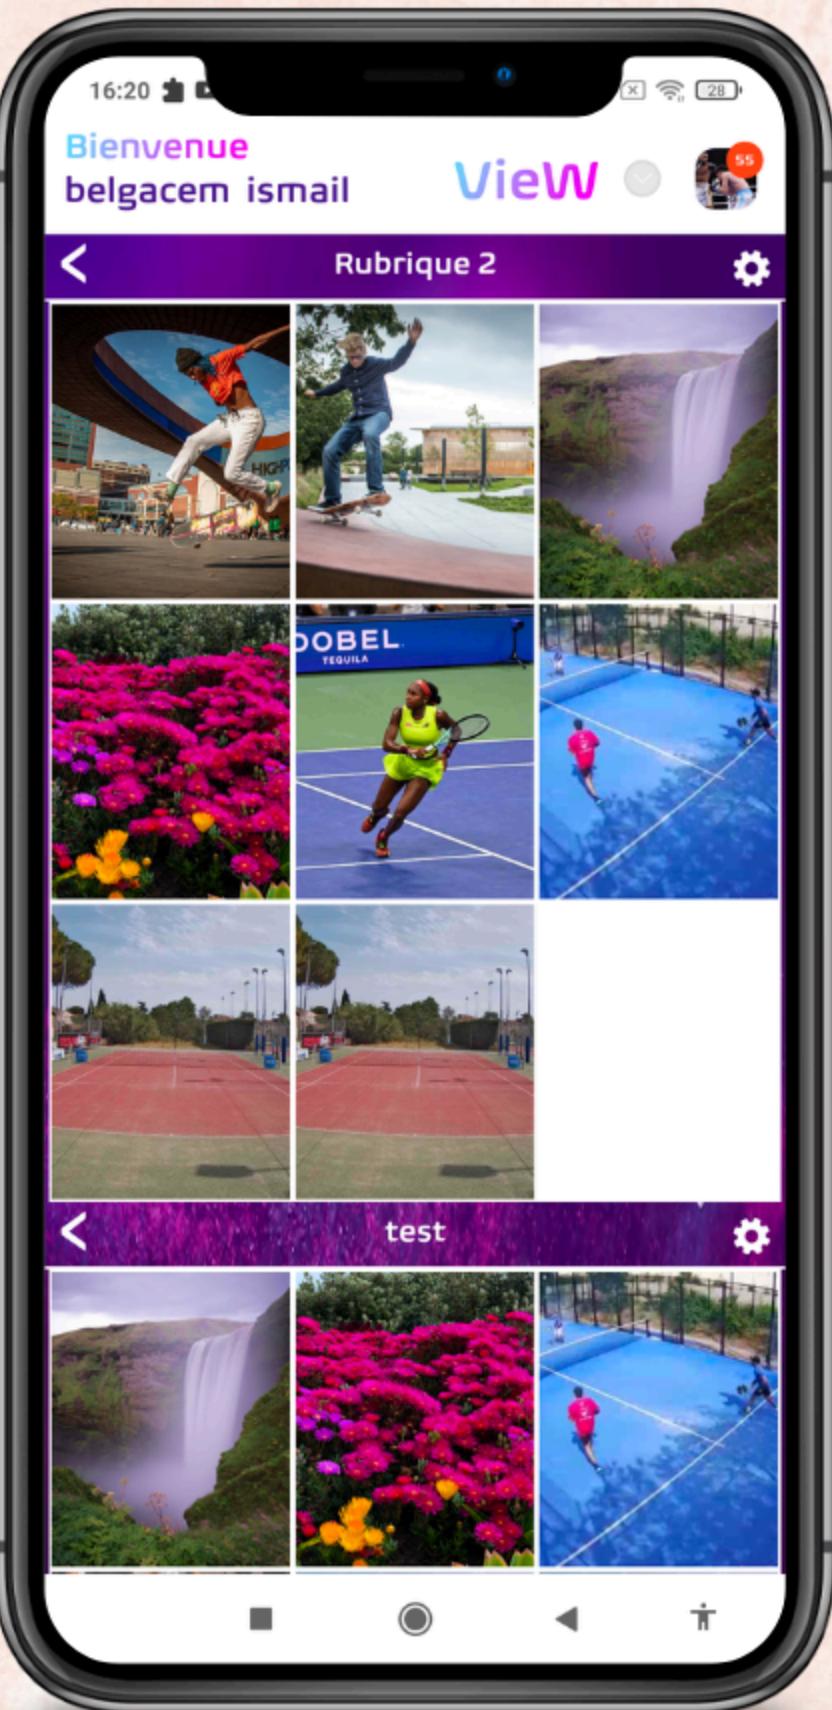

The SeeYou app utilizes the following technologies:

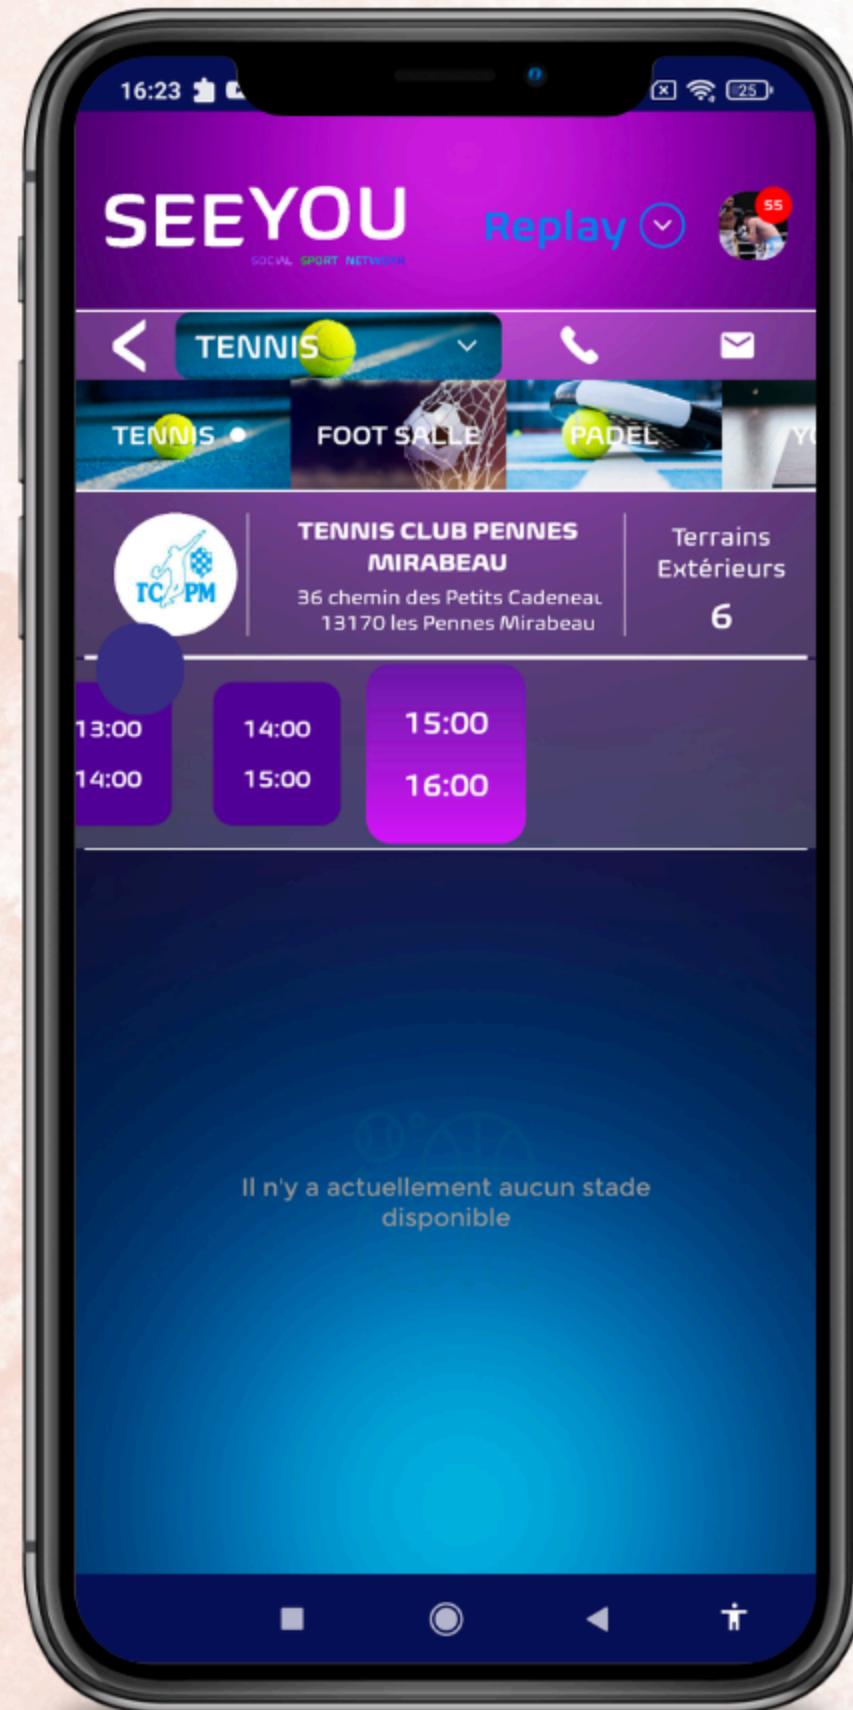

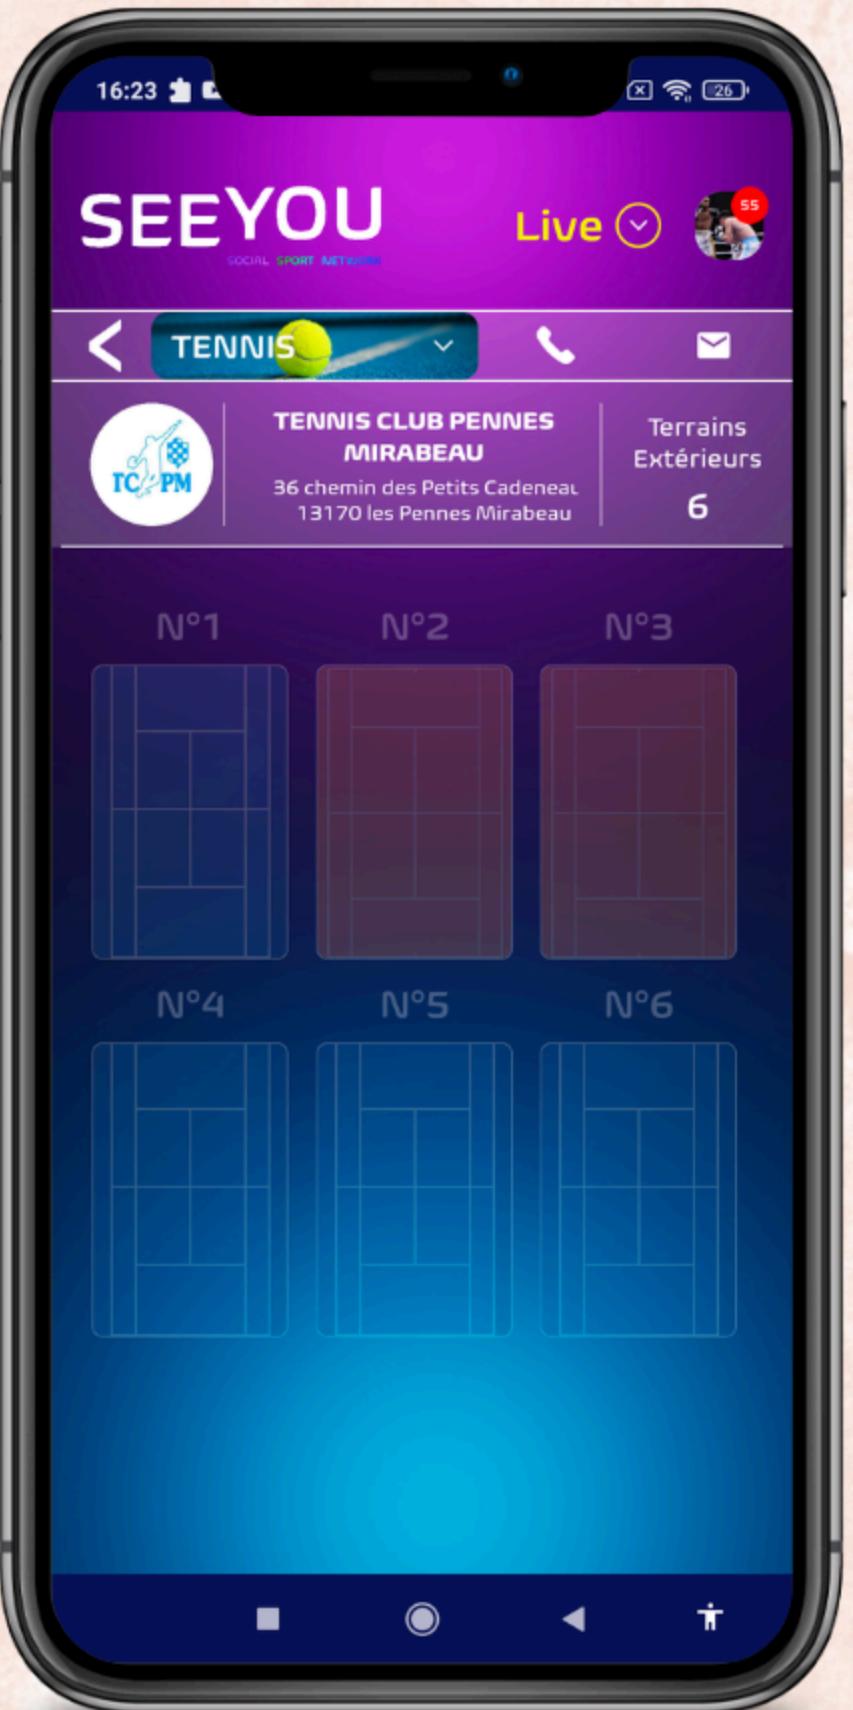

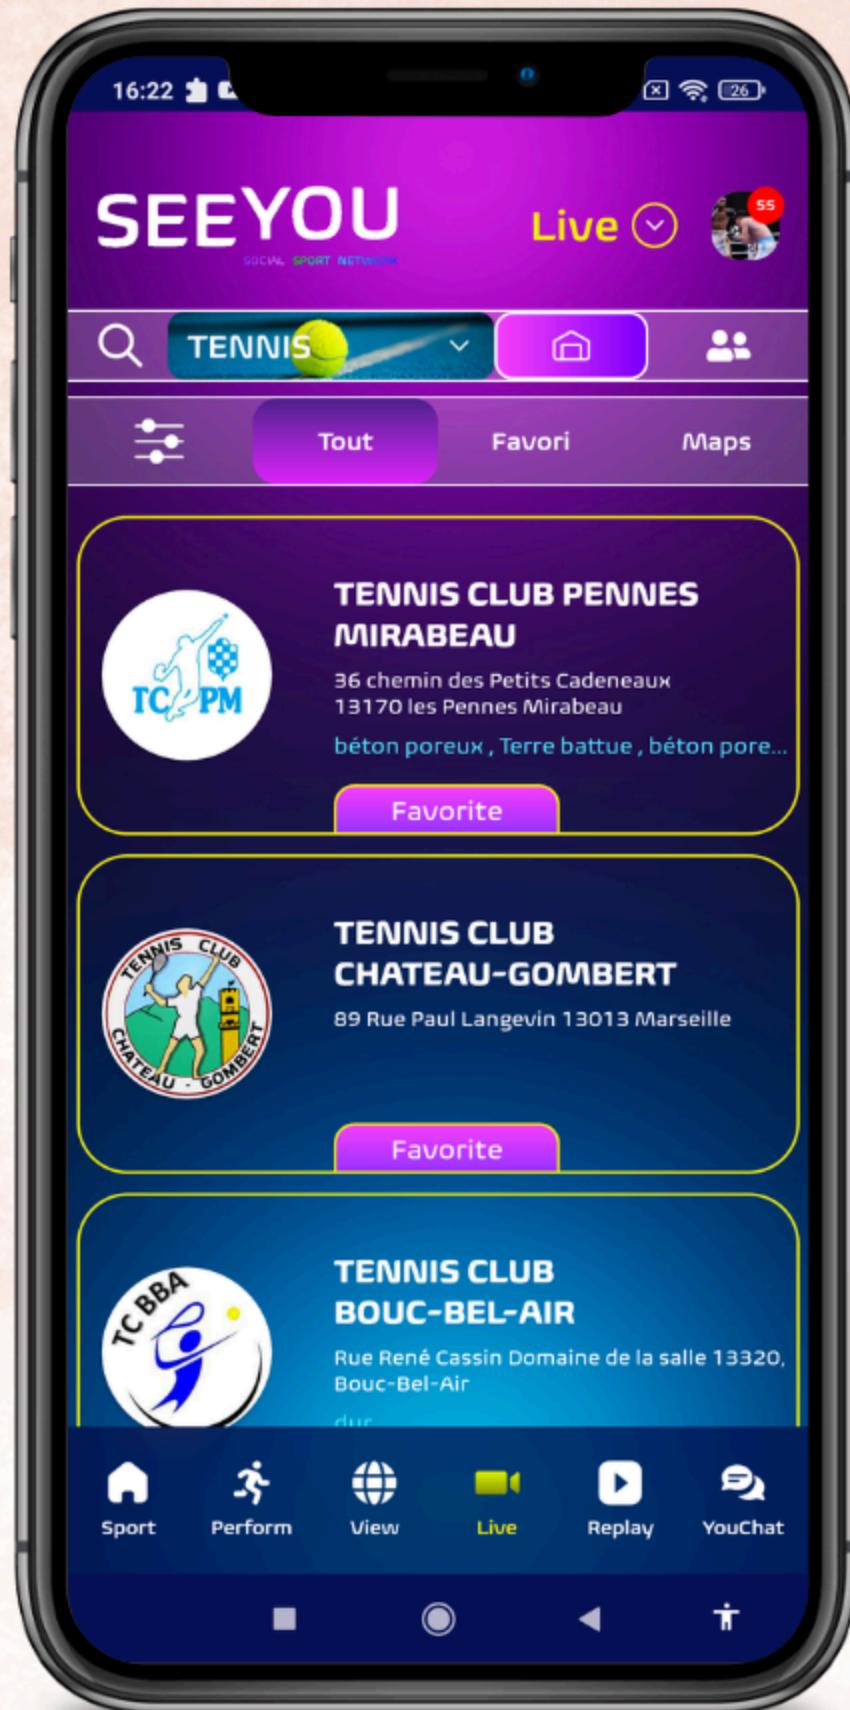

- **Kotlin for programming.**
- **Android Studio as the integrated development environment (IDE).**
- **MVVM (Model-View-ViewModel) architectural pattern.**
- **Binding for connecting UI components to data sources.**
- **Flow for managing asynchronous data streams.**
- **Amazon Broadcast for live broadcasting.**
- **Ktor for building asynchronous servers and clients.**
- **Hilt dagger**
- **Socket for real-time communication features.**
